

AMBIENT ELECTRICAL PROPERTIES SYSTEM

Gincor's AMBIENT ELECTRICAL PROPERTIES SYSTEM is a system that allows measuring multiple electrical properties of core plug samples. Properties Measurements like the Formation Factor and Resistivity Index at ambient conditions.

The equipment includes a digital resistivity meter, 2 & 4-terminal adapter for 1" and 1,5" diameter plug samples, Ambient brine resistivity cell, Computer data acquisition system is optional for automatic collection of resistance data.

The equipment has fluid media compatibility and the Standard Pore Wetted Materials: Stainless Steel, glass, silver, plastic.
